Author index

Volume 66 (2004)

Åkerstedt, T., see Kecklund, G. **66**, 169

Bigman, Z., H. Pratt, Time course and nature of stimulus evaluation in category induction as revealed by visual event-related potentials **66**, 99
Brockhaus, A., see Tendolkar, I. **66**, 235
Burns, V.E., C. Ring, L.K. Harrison, D. Carroll, M. Drayson, Reductions in secretory immunoglobulin A to cold pressor stress are not influenced by timing of saliva sampling **66**, 91

Carroll, D., see Burns, V.E. **66**, 91
Colrain, I.M., see Webster, K.E. **66**, 21
Davenport, P.W., see Webster, K.E. **66**, 21

Díaz, F., see Lindín, M. **66**, 153
Desain, P., see Jongsma, M.L.A. **66**, 129
Donaldson, D., see Tendolkar, I. **66**, 235
Drayson, M., see Burns, V.E. **66**, 91
Dykman, R.A., see Pivik, R.T. **66**, 191

Eimer, M., see Forster, B. **66**, 1

Fairclough, S.H., K. Houston, A metabolic measure of mental effort **66**, 177
Fernández, G., see Tendolkar, I. **66**, 235
Forster, B., M. Eimer, The attentional selection of spatial and non-spatial attributes in touch: ERP evidence for parallel and independent processes **66**, 1

Gordon, E., see Hermens, D.F. **66**, 221
Gross, D., see Vrana, S.R. **66**, 63

Harris, J.E., see Wetherell, M.A. **66**, 257
Harrison, L.K., see Burns, V.E. **66**, 91
Hermens, D.F., L.M. Williams, I. Lazzaro, S. Whitmont, D. Melkonian, E. Gordon, Sex differences in adult ADHD: a double dissociation in brain activity and autonomic arousal **66**, 221
Hillman, C.H., K.S. Rosengren, D.P. Smith, Emotion and motivated behavior: postural adjustments to affective picture viewing **66**, 51
Honing, H., see Jongsma, M.L.A. **66**, 129
Houston, K., see Fairclough, S.H. **66**, 177
Hyland, M.E., see Wetherell, M.A. **66**, 257

Jongsma, M.L.A., P. Desain, H. Honing, Rhythmic context influences the auditory evoked potentials of musicians and nonmusicians **66**, 129

Kecklund, G., T. Åkerstedt, Apprehension of the subsequent working day is associated with a low amount of slow wave sleep **66**, 169
Klosterkötter, J., see Tendolkar, I. **66**, 235

Lazzaro, I., see Hermens, D.F. **66**, 221
Lindín, M., M. Zurrón, F. Díaz, Changes in P300 amplitude during an active standard auditory oddball task **66**, 153

Martin, F., see Watters, P.A. **66**, 79
Melkonian, D., see Hermens, D.F. **66**, 221

Pivik, R.T., R.A. Dykman, Endogenous eye blinks in preadolescents: relationship to information processing and performance **66**, 191
Pratt, H., see Bigman, Z. **66**, 99

Rammsayer, T., J. Stahl, Extraversion-related differences in response organization: evidence from lateralized readiness potentials **66**, 35
Ring, C., see Burns, V.E. **66**, 91
Rosengren, K.S., see Hillman, C.H. **66**, 51
Ruhrmann, S., see Tendolkar, I. **66**, 235

Smith, D.P., see Hillman, C.H. **66**, 51
Stahl, J., see Rammsayer, T. **66**, 35

Tendolkar, I., S. Ruhrmann, A. Brockhaus, D. Donaldson, K. Wirtz, G. Fernández, J. Klosterkötter,

doi:10.1016/S0301-0511(04)00069-9

Neural correlates of temporal context discrimination **66**, 235

Vrana, S.R., D. Gross, Reactions to facial expressions: effects of social context and speech anxiety on responses to neutral, anger, and joy expressions **66**, 63

Watters, P.A., F. Martin, A method for estimating long-range power law correlations from the electroencephalogram **66**, 79

Webster, K.E., I.M. Colrain, P.W. Davenport, P300 from inspiratory occlusion reflects orienting but not startle **66**, 21

Wetherell, M.A., M.E. Hyland, J.E. Harris, Secretory immunoglobulin A reactivity to acute and cumulative acute multi-tasking stress: relationships between reactivity and perceived workload **66**, 257

Whitmont, S., see Hermens, D.F. **66**, 221

Williams, L.M., see Hermens, D.F. **66**, 221

Wirtz, K., see Tendolkar, I. **66**, 235

Zurrón, M., see Lindín, M. **66**, 153

Subject index

Volume 66 (2004)

Active standard auditory oddball task **66**, 153
Acute stress **66**, 257
Adolescence **66**, 99
Adult ADHD **66**, 221
AEP **66**, 129
Approach-withdrawal **66**, 51
Arousal **66**, 221
Attention **66**, 191
Automatic versus controlled processing **66**, 153

Behavior **66**, 51
Blink **66**, 21
Blood glucose **66**, 177

Center of pressure, COP **66**, 51
Cold pressor **66**, 91
Continuous performance task **66**, 191
Cumulative acute stress **66**, 257

Declarative memory **66**, 235
DFA **66**, 79
Dopamine **66**, 191

EEG **66**, 79, 221
Emotional expression **66**, 63
Endogenous blink **66**, 191
ERP **66**, 129
Event-related potentials **66**, 1, 235
Evoked potentials **66**, 35
Extraversion **66**, 35

Facial EMG **66**, 63
Familiarity **66**, 235
Feature analysis **66**, 99
Frequency **66**, 1

Gender **66**, 191
Geometric shapes **66**, 99

Heart rate variability **66**, 177

Intensity **66**, 1

Lateralized readiness potentials **66**, 35
Location **66**, 1

Medial temporal lobe **66**, 235
Mental effort **66**, 177
Music **66**, 129

Old/new effect **66**, 235
Orienting response **66**, 21

P300 amplitude **66**, 153
P300 **66**, 21, 129
P3a **66**, 129
P3b **66**, 129
P450 **66**, 99
Parietal N170 **66**, 99
Posture **66**, 51
Preadolescents **66**, 191
Prefrontal cortex **66**, 235

Reaction time **66**, 191
Recency memory **66**, 235
Recollection **66**, 235
Repeated stimulation **66**, 153
Respiratory related evoked potential **66**, 21
Response organization **66**, 35
Rhythm **66**, 129

S-IgA reactivity **66**, 257
SCL **66**, 221
Secretory immunoglobulin A **66**, 91
Sex differences **66**, 221
Social context **66**, 63
Speech anxiety **66**, 63
Startle reflex **66**, 51
Startle **66**, 21
Stimulus analysis **66**, 35

Tactile attention **66**, 1
Theta **66**, 221
Timing **66**, 91

Workload perceptions **66**, 257
